## Speed up Precision Healthcare with Innovative Technologies in the Digital Era

### SABPA OC/LA 16th Annual Biomedical Forum

This exciting forum by SABPA OC/LA will bring you the latest innovations in biomedical industries, cutting-edge developments of pharmaceuticals and medical devices, entrepreneurship, and career development. We aim to provide an attractive platform to promote life sciences and biotechnology, connect entrepreneurs, scientists, investors and students, and stimulate alliances across biomedical industries in SoCal area and beyond. Join us for the exciting learning and networking opportunities!

### Keynote Speaker: Abraham Phillip Lee Keynote: Microfluidic Cell Engineering for Immunotherapies

Chancellor's Professor of Biomedical Engineering, MAE and PharmSci at UC Irvine. Current Director of the NSF I/UCRC "Center for Advanced Design & Manufacturing of Integrated Microfluidics" (CADMIM). Inventor of over 60 issued US patents & author of over 130 journals articles. Awardee of the 2009 Pioneers of Miniaturization Prize. Fellow of the National Academy of Inventors (NAI). Dr. Lee's current research focuses on integrated microfluidic systems for precision medicine including liquid biopsy, microphysiological systems, cell engineering, and immunotherapy. His research has contributed to the founding of several start-up companies.
